The acclaimed chronicle of the discovery of the legendary lost civilization of the Maya. Includes the history of the major Maya sites, including Palenque, Uxmal, Chichen Itza, Tuloom, Copan, and more. NEW YORK TIMES BESTSELLER • Illustrated with a map and more than 100 images. In 1839, rumors of extraordinary yet baffling stone ruins buried within the unmapped jungles of Central America reached two of the world's most intrepid travelers. Seized by the reports, American diplomat John Lloyd Stephens and British artist Frederick Catherwood—both already celebrated for their adventures in Egypt, the Holy Land, Greece, and Rome—sailed together out of New York Harbor on an expedition into the forbidding rainforests of present-day Honduras, Guatemala, and Mexico. What they found would upend the West's understanding of human history. In the tradition of *Lost City of Z* and *In the Kingdom of Ice*, former San Francisco Chronicle journalist and Pulitzer Prize finalist William Carlsen reveals the remarkable story of the discovery of the ancient Maya. Enduring disease, war, and the torments of nature and terrain, Stephens and Catherwood meticulously uncovered and documented the remains of an astonishing civilization that had flourished in the Americas at the same time as classic Greece and Rome—and had been its rival in art, architecture, and power. Their masterful book about the experience, written by Stephens and illustrated by Catherwood, became a sensation, hailed by Edgar Allan Poe as “perhaps the most interesting book of travel ever published” and recognized today as the birth of American archaeology. Most important, Stephens and Catherwood were the first to grasp the significance of the Maya remains,

understanding that their antiquity and sophistication overturned the West's assumptions about the development of civilization. By the time of the flowering of classical Greece (400 b.c.), the Maya were already constructing pyramids and temples around central plazas. Within a few hundred years the structures took on a monumental scale that required millions of man-hours of labor, and technical and organizational expertise. Over the next millennium, dozens of city-states evolved, each governed by powerful lords, some with populations larger than any city in Europe at the time, and connected by road-like causeways of crushed stone. The Maya developed a cohesive, unified cosmology, an array of common gods, a creation story, and a shared artistic and architectural vision. They created stucco and stone monuments and bas reliefs, sculpting figures and hieroglyphs with refined artistic skill. At their peak, an estimated ten million people occupied the Maya's heartland on the Yucatan Peninsula, a region where only half a million now live. And yet by the time the Spanish reached the “New World,” the Maya had all but disappeared; they would remain a mystery for the next three hundred years. Today, the tables are turned: the Maya are justly famous, if sometimes misunderstood, while Stephens and Catherwood have been nearly forgotten. Based on Carlsen's rigorous research and his own 1,500-mile journey throughout the Yucatan and Central America, *Jungle of Stone* is equally a thrilling adventure narrative and a revelatory work of history that corrects our understanding of Stephens, Catherwood, and the Maya themselves. In today's world hunter-gatherer societies struggle with seemingly insurmountable problems: deforestation and encroachment, language loss, political domination by surrounding communities. Will they manage to survive? This book is about one such society living in the monsoon rainforests of western Nepal: the Raute. *Kings of the Forest* explores how this elusive ethnic group, the last hunter-gatherers of the Himalayas, maintains its traditional way of life amidst increasing pressure to assimilate. Author Jana Fortier examines Raute social strategies of survival as they roam the lower Himalayas gathering wild yams and hunting monkeys. Hunting is part of a symbiotic relationship with local Hindu farmers, who find their livelihoods threatened by the monkeys' raids on their crops. Raute hunting helps the Hindus, who consider the monkeys sacred and are reluctant to kill the animals themselves. Fortier explores Raute beliefs about living in the forest and the central importance of foraging in their lives. She discusses Raute identity formation, nomadism, trade relations, and religious beliefs, all of which turn on the foragers' belief in the moral goodness of their unique way of life. The book concludes with a review of issues that have long been important to anthropologists—among them, biocultural diversity and the shift from an evolutionary focus on the ideal hunter-gatherer

to an interest in hunter-gatherer diversity. *Kings of the Forest* will be welcomed by readers of anthropology, Asian studies, environmental studies, ecology, cultural geography, and ethnic studies. It will also be eagerly read by those who recognize the critical importance of preserving and understanding the connections between biological and cultural diversity. Lost cities in the jungle and towering temple pyramids form only a small part of Mayan culture. This fascinating people achieved the landmarks of an advanced civilisation - such as a highly developed writing system and densely populated cities - in the classical period (AD 300-600), earning them a place among the greatest civilisations in the world. However, this period represents just one phase in the history of the Mayan culture, which extends over thousands of years. Our knowledge of Mayan life has increased dramatically in recent decades. As a result, specialists from a wide range of disciplines have contributed to this book in order to represent all of the latest research on the Maya. A girl makes a secret sacrifice to the faerie king in this lush New York Times bestselling fantasy by author Holly Black In the woods is a glass coffin. It rests on the ground, and in it sleeps a boy with horns on his head and ears as pointed as knives.... Hazel and her brother, Ben, live in Fairfold, where humans and the Folk exist side by side. Since they were children, Hazel and Ben have been telling each other stories about the boy in the glass coffin, that he is a prince and they are valiant knights, pretending their prince would be different from the other faeries, the ones who made cruel bargains, lurked in the shadows of trees, and doomed tourists. But as Hazel grows up, she puts aside those stories. Hazel knows the horned boy will never wake. Until one day, he does.... As the world turns upside down, Hazel has to become the knight she once pretended to be. *The Darkest Part of the Forest* is bestselling author Holly Black's triumphant return to the opulent, enchanting faerie tales that launched her YA career. Excerpt from *The Forest of Essex: Its History, Laws, Administration and Ancient Customs*, and *The Wild Deer Which Lived in It* Historians, following the old chroniclers, or one another, have dwelt much upon the cruelties practised under the Forest laws, but have told us very little about the Royal Forests themselves or their Purlieus; or of the manner in which the laws were administered. Of the Forest of Essex in particular we have little or no information from the County historians, beyond occasional notices of the holders of Forest offices, or of the position of their estates within the bounds of the Forest. Yet the district which from time immemorial was Royal Forest formed no small part of the County; and nearly the whole of it was at one time or another made subject to the Forest laws. Excerpt from *Kings of the Forest and Their Kindred Tribes: Pictures and Stories of the World's Wild Animals*, Collected and Arranged for the Amusement and Instruction of Readers of All Ages, but Especially for the Young The appearance and habits of the wild animals that live in the forests of our own, and other lands can be known to most of us only through books. But our acquaintance with them need not, for this reason, be scanty or incomplete: their story is fully told. By the many Naturalists and

Hunters who have visited them in their native forests and studied out all their ways. While some of these writers have never traveled beyond the boundaries of our own land, or perhaps may have even lived near our own homes, they yet find much to tell us about wild creatures which we seldom see, whose habits, except for the keen sight and patient study of these lovers of nature and her works, would never be known. But of far more thrilling interest, are the experiences of those who, having journeyed to foreign lands, are able, with ready pen and skillful pencil, to picture to us the beautiful, the strange - the sometimes hideous forms of savage beasts which people the dark solitudes of African and Indian forests. A school camping trip takes a turn for the sinister in this page-turning thriller for fans of mysteries and the supernatural. Ann Holmes seems an unlikely candidate for revelation. A sixteen-year-old runaway, she is an itinerant mushroom picker who lives in a tent. Her past has been hardscrabble. Then one November afternoon, in the foggy woods of North Fork, Washington, the Virgin comes to her, clear as day. Is this delusion, a product of her occasional drug use, or a true calling to God? Gradually word spreads, and thousands converge upon the already troubled town. For Tom Cross, an embittered logger who's been out of work since his son was paralysed in a terrible accident, the possibility that Ann's visions are real offers a last chance for him and his son. As Father Collins searches both his own soul and Ann's; as Carolyn struggles with her less than admirable intentions; as Tom alternates between despair and hope; Our Lady of the Forest combines suspense, grit and humour in a story of faith at a contemporary crossroad. A brilliant addition to the Books of Bayern, this book is a treat for fans of this series, and stands alone for readers who might be discovering the joys of Shannon Hale's writing for the first time. NATIONAL BESTSELLER • "Rutherford brings England's New Forest to life" (The Seattle Times) in this companion to the critically acclaimed *Sarum* From the time of the Norman Conquest to the present day, the New Forest, along England's southern coast, has remained an almost mythical place. It is here that Saxon and Norman kings rode forth with their hunting parties, and where William the Conqueror's son Rufus was mysteriously killed. The mighty oaks of the forest were used to build the ships for Admiral Nelson's navy, and the fishermen who lived in Christchurch and Lymington helped Sir Francis Drake fight off the Spanish Armada. The New Forest is the perfect backdrop for the families who people this epic story. The feuds, wars, loyalties, and passions of many hundreds of years reach their climax in a crime that shatters the decorous society of Bath in the days of Jane Austen, whose family lived on the edge of the Forest. Edward Rutherford is a master storyteller whose sense of place and character—both fictional and historical—is at its most vibrant in *The Forest*. "As entertaining as *Sarum* and Rutherford's other sweeping novel of British history, *London*."—The Boston Globe A Boy becomes the fifth King of the Forest when he teaches four mighty animal monarchs to do four special things. A frightening suspense novel about nine-year-old Trisha, who becomes lost in the woods as night falls. The life-long inventor, Lee de Forest invented the three-element vacuum tube used between 1906 and 1916 as a detector, amplifier, and oscillator of radio waves. Beginning in 1918 he began to develop a light valve, a device for writing and reading sound using light patterns. While he received many patents for his process, he was initially ignored by the film industry. In order to promote and demonstrate his process he made several hundred sound short films, he rented space for their showing; he sold the tickets and did the publicity to gain audiences for his invention. Lee de Forest officially brought sound to film in 1919. *Lee De Forest: King of Radio, Television, and Film* is about both invention and early film making; de Forest as the scientist and producer, director, and writer of the content. This book tells the story of de Forest's contribution in changing the history of film through the incorporation of sound. The text includes primary source historical material, U.S. patents and richly-illustrated photos of Lee de Forest's experiments. Readers will greatly benefit from an understanding of the transition from silent to audio motion pictures, the impact this had on the scientific community and the popular culture, as well as the economics of the entertainment industry. *The Record of Buddhist Kingdoms* is a classic travelogue that records the Chinese monk Faxian's journey in the early fifth century CE to Buddhist sites in Central and South Asia in search of sacred texts. In the nineteenth century, it traveled west to France, becoming in translation the first scholarly book about "Buddhist Asia," a recent invention of

Europe. This text fascinated European academic Orientalists and was avidly studied by Hegel, Schopenhauer, and Nietzsche. The book went on to make a return journey east: it was reintroduced to Inner Asia in an 1850s translation into Mongolian, after which it was rendered into Tibetan in 1917. Amid decades of upheaval, the text was read and reinterpreted by Siberian, Mongolian, and Tibetan scholars and Buddhist monks. Matthew W. King offers a groundbreaking account of the transnational literary, social, and political history of the circulation, translation, and interpretation of Faxian's Record. He reads its many journeys at multiple levels, contrasting the textual and interpretative traditions of the European academy and the Inner Asian monastery. King shows how the text provided Inner Asian readers with new historical resources to make sense of their histories as well as their own times, in the process developing an Asian historiography independently of Western influence. Reconstructing this circulatory history and featuring annotated translations, *In the Forest of the Blind* models decolonizing methods and approaches for Buddhist studies and Asian humanities. Danger lurks within the roots of *Forest of Souls*, an epic, unrelenting tale of destiny and sisterhood, perfect for fans of Naomi Novik and Susan Dennard. "A tantalizing beginning to a rich new fantasy series." —Traci Chee, NYT bestselling author of *The Reader* trilogy "Absolutely enchanting." —Natalie C. Parker, author of *Seafire* "You won't want to escape." —Sarah Henning, author of the *Sea Witch* "Will leave you shouting sisters unite!" —Mindee Arnett, author of *Onyx & Ivory* and *Avalon* *Sirscha Ashwyn* comes from nothing, but she's intent on becoming something. After years of training to become the queen's next royal spy, her plans are derailed when shamans attack and kill her best friend Saengo. And then *Sirscha*, somehow, restores Saengo to life. Unveiled as the first soulguide in living memory, *Sirscha* is summoned to the domain of the Spider King. For centuries, he has used his influence over the Dead Wood—an ancient forest possessed by souls—to enforce peace between the kingdoms. Now, with the trees growing wild and untamed, only a soulguide can restrain them. As war looms, *Sirscha* must master her newly awakened abilities before the trees shatter the brittle peace, or worse, claim Saengo, the friend she would die for. As a boy, Tod saves the small white fawn from certain death. They grow up together but when the fine stag leaves, Tod could never have predicted that he would become so powerful that he becomes King. And no kingdom can have two kings. In an age when people are in search of new and more fulfilling experiences to replace screens and bring families together, this book explores 100 ways to connect with nature and discover the benefits of forest fun. From bushcraft activities like whittling and firelighting to spiritual pursuits like forest bathing and meditation, forest educator Jennifer Davis has brought together activities for people of all ages, helping them to connect with their forests and woodlands, while discovering the healing and restorative benefits of a life lived outdoors.
