"Leading the way describes how the men and women of Air Force civil engineering have provided the basing that enabled the Air Force to fly, fight, and win. This book depicts how engineers built hundreds of bases during World Wars I and II, Korea, Vietnam, the Gulf War, and Operations Enduring Freedom and Iraqi Freedom. At the same time, these engineers operated and maintained a global network of enduring, peacetime bases. It describes the engineers' role in special projects such as the ballistic missile program, the Arctic early warning sites, and construction of the U.S. Air Force Academy. Using hundreds of sources, this detailed narrative tells the story of how civil engineers have been organized, trained, equipped, and employed for more than 100 years. From the beaches of Normandy to the mountains of Afghanistan, civil engineers have forged an unmatched record of success and built a solid foundation for today's Air Force."--Back cover.

By focusing on the cognitive-behavioral model and treatment options, Dugas and Robichaud present a detailed analysis of the etiology, assessment, and treatment of Generalized Anxiety Disorder (GAD). Cognitive-Behavioral Treatment for Generalized Anxiety Disorder: From Science to Practice provides a review of the empirical support for the different models of GAD. It includes a detailed description of the assessment and step-by-step treatment of GAD (including many examples of therapist-client dialogue), data on treatment efficacy in individual and group therapy, and concludes with a description of maintenance and follow-up strategies.

Developments in IT and the resulting knowledge-based economy have challenged traditional concepts of office design, as well as many of the larger architectural and urban design models. This book examines the implications of this revolution on current urban design and identifies potential new trends in office design from an international perspective. Six themes are addressed: IT and building infrastructure new

office/new community organizational change high performance building envelopes interior environment value added sustainable design. These forward-thinking essays have been contributed by practitioners and academics from a wide spectrum of interests to deliver an illuminating look into the unfolding possibilities and challenges ahead. Eighteen case studies from the global marketplace look at evaluation practices in which the process is fully integrated into the design, development, and delivery of programs. InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects. InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects. The Picture Book of Quantum Mechanics enables students to understand wave mechanics intuitively by graphically illustrating the time evolution and parameter dependence of wave functions in a wide variety of situations. It includes 200 computer-generated solutions of the Schrodinger equation for one- and three-dimensional systems generated by Brandt and Dahmen's Interquanta program. The National Fire Protection Association (NFPA) And The International Association Of Fire Chiefs (IAFC) Are Pleased To Bring You The Second Edition Of Fire Officer: Principles And Practice, A Modern Integrated Teaching And Learning System For The Fire Officer I And II Levels. Fire Officers Need To Know How To Make The Transition From Fire Fighter To Leader. Fire Officer: Principles And Practice, Second Edition Is Designed To Help Fire Fighters Make A Smooth Transition To Fire Officer. Covering The Entire Scope Of NFPA 1021, Standard For Fire Officer Professional Qualifications, 2009 Edition, Fire Officer Combines Current Content With Dynamic Features And Interactive Technology To Better Support Instructors And Help Prepare Future Fire Officers For Any Situation That May Arise.

Safety Is Principle! The Second Edition Features A Laser-Like Focus On Fire Fighter Safety. Reducing Fire Fighter Injuries And Deaths Requires The Dedicated Efforts Of Every Fire Fighter, Fire Officer, Fire Department, And The Entire Fire Community Working Together. It Is With This Goal In Mind That We Have Integrated The 16 Firefighter Life Safety Initiatives Developed By The National Fallen Firefighters Foundation Into The Text. Likewise, In Each Of The Chapters, Actual National Fire Fighter Near-Miss Reporting System Cases Are Discussed To Drive Home Safety And The Lessons Learned From Those Incidents. Some Of The Guiding Principles Added To The New Edition Include: □Description Of The "Everybody Goes Home" And The National Fire Fighter Near-Miss Reporting System, Including Over A Dozen Company Officer Near-Miss Examples Throughout The Text. □Description Of The IAFC/IAFF Firefighter Safety And Deployment Study. □The Latest Fire Fighter Death And Injury Issues As Reported By The NFPA? National Fallen Firefighters Foundation, IAFC, And IAFF, Including Results Of A Thirty-Year Retrospective Study. □Changes In Fire-Ground Accountability And Rapid Intervention Practices. □Results Of National Institute Of Standards And Technology Research On Wind-Driven Fires, Thermal Imaging Cameras, And Fire Dynamics As Related To Fire Fighter Survival. □The Latest Developments In Crew Resource Management. The Second Edition Also Reflects The Latest Developments In: □Building A Personal Development Plan Through Education, Training, Self-Development, And Experience, Including A Description Of The Fire And Emergency Services Higher Education (FESHE) Program. □The Impact Of Blogs, Video Sharing, And Social Networks. □How To Budget For A Grant. □Changes In The National Response Framework And National Incident Management System. Additional Items Related To Fire Fighter Safety And Health Are Included. For more than 40 years, Computerworld has been

the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network. Presents information on more than 1,400 computer companies, an overview of the computer industry, lists of the largest and fastest-growing companies, and in-depth profiles on 250 of the largest high-tech firms

The fourth edition of *Fire Officer: Principles and Practice* was significantly updated and reorganized to better serve the Fire Officer I and Fire Officer II. The content meets and exceeds the job performance requirements for Fire Officer I and II in the 2020 Edition of NFPA 1021, Standard for Fire Officer Professional Qualifications. The new edition places an emphasis on the application of leadership traits and management theories, common leadership and management challenges, and how leadership is used to meet objectives. The basic principles and methods of Community Risk Reduction are also discussed. In addition, the program now has two distinct sections: Section One includes eight chapters, which set the foundation for Fire Officer I knowledge and understanding. Section Two comprises six chapters, which encompass the higher level competencies required for Fire Officer II. This new organization will allow you the flexibility to teach your Fire Officer I and II course(s) exactly the way you wish.

The authority on rail systems around the globe. Track the latest developments in railway systems and equipment manufacturers across the globe with this authoritative industry survey. Emphasising the essential techniques of business best practices, this title offers thorough analysis and discussions on concepts such as environmental analysis, strategy development and strategy implementation. Based on privileged access to the British Railway Board's rich archives, this book provides an authoritative account of the progress

made by the British Railway System prior to its privatization. It offers a unique account of the last fifteen years of nationalized railways in Britain, and it sheds light on the current problems of privatized railway systems. This volume is divided into four complete and concise sections for complete study: 'Railways Under Labour (1974-1979)', 'The Thatcher Revolution (British Rail in the 1980's)', 'On The Threshold of Privatization: Running the Railways (1990-1994)', and 'Responding to Privatization (1981-1997)'. Author Terry Gourvish is considered Britain's leading railway historian.

Innovation in Product Design gives an overview of the research fields and achievements in the development of methods and tools for product design and innovation. It presents contributions from experts in many different fields covering a variety of research topics related to product development and innovation. Product lifecycle management, knowledge management, product customization, topological optimization, product virtualization, systematic innovation, virtual humans, design and engineering, and rapid prototyping are the key research areas described in the book. It also details successful case studies developed with industrial companies. Innovation in Product Design is written for academic researchers, graduate students and professionals in product development disciplines who are interested in understanding how novel methodologies and technologies can make the product development process more efficient.

Intended for all segments of agribusiness as well as non-agribusiness organizations, AGRIBUSINESS:PRINCIPLES OF MANAGEMENT presents the changing face of agribusiness in a format that is interesting, straightforward, and easy to understand. This comprehensive book approaches agribusiness as a technology-oriented industry composed of organizations ranging in size from small, family-owned farms or businesses to some of the largest corporations in the world.

With multiple opportunities for self-review as well as vignettes, cases, and examples in each chapter, this book shows readers the real-world application of what they are learning and provides them with a solid understanding of what management is all about. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

A witch's curse, an imperialist conspiracy, a racist plot--Alexander Rödlach draws on a decade of research and work in Zimbabwe to compare local beliefs about the cause of the HIV/AIDS epidemic in Africa and the impact of these beliefs on public health and advocacy programs.

"Whether you call it "lean start-up," "design thinking," or "agile," a new method is revolutionizing how to successfully create, refine, and bring ideas to market--without traditional business planning. But because these ideas and techniques run counter to conventional managerial thinking and practice, managers in established organizations have difficulty implementing them. Innovation experts Nathan Furr and Jeff Dyer aim to change that. Based on field work with thousands of managers and validated insidedozens of companies, **THE INNOVATOR'S METHOD** shows when and how to apply a "lean start-up" approach to innovation in established businesses. **THE INNOVATOR'S METHOD** takes managers through these new practices for managing innovation, showing how to adapt them to their businesses and answering such questions as: How do we know this idea is worth pursuing? Does it solve the right problem for customers? Have we found the right solution? Do we have the right business model for our new offering? With detailed cases from the authors' work implementing these ideas with companies such as Intuit, NEC, P&G, Virgin Airlines, Kia, Folio, Citi, Hallmark, and Verizon, **THE INNOVATOR'S METHOD** picks up where Jeff Dyer's **THE INNOVATOR'S DNA** leaves off, showing how to test, validate and commercialize ideas with

the lean and agile techniques that successful entrepreneurs use"-- Based on empirical research from over 240 interviews, the authors present new concepts and trends in global R&D management. Case studies from 18 best-practice companies give detailed answers to the most pressing challenges for mastering international innovation. "This research book is a repository for academicians, researchers, and industry practitioners to share and exchange their research ideas, theories, and practical experiences, discuss challenges and opportunities, and present tools and techniques in all aspects of e-business development and management in the digital economy"--Provided by publisher. "Soldiers who receive training in the workplace, at their residences, or at other sites outside the traditional classroom increasingly rely upon asynchronous distributed learning systems. This accentuates the need to identify various forms of training compromise, such as obtaining questions beforehand or enlisting a proxy for test taking in non-proctored, web-based learning environments. A one-day workshop, summarized in this report, was conducted to identify practical solutions to training compromise on the Web or military intranets. Experts from government, academia, and industry generated solutions in the areas of test security, biometrics (including fingerprint identification, face recognition, iris scanning, and hand writing recognition), legal issues, public key infrastructure, instructional design, and test design. Following the workshop, an Army advisory group prioritized the solutions into a final list of recommendations, included here as a starting point for addressing and preventing training compromise."--DTIC. Just after 9:00 a.m. on February 1, 2003, the space shuttle Columbia broke apart and was lost over Texas. This tragic event led, as the Challenger accident had 17 years earlier, to an intensive government investigation of the technological and organizational causes of the accident. The investigation

found chilling similarities between the two accidents, leading the Columbia Accident Investigation Board to conclude that NASA failed to learn from its earlier tragedy. Despite the frequency with which organizations are encouraged to adopt learning practices, organizational learning—especially in public organizations—is not well understood and deserves to be studied in more detail. This book fills that gap with a thorough examination of NASA's loss of the two shuttles. After offering an account of the processes that constitute organizational learning, Julianne G. Mahler focuses on what NASA did to address problems revealed by Challenger and its uneven efforts to institutionalize its own findings. She also suggests factors overlooked by both accident commissions and proposes broadly applicable hypotheses about learning in public organizations. Dispelling the myth that innovation is invention & revolution, this text argues that innovators past & present have employed a strategy of technology brokering to source, develop & exploit new ideas. It provides a clear set of recommendations for managing the innovation process in organizations.
