For more than 35 years, the Hoffman Process has been recognized as one of the most potent transformational processes; however, the 8-day residential program is out of reach for most people. Now, Tim Laurence reveals this powerful methodology with warmth and clarity. Using practical exercises, personal stories, case histories, and insightful commentary, Laurence skillfully teaches how to identify and resolve the inherited patterns of behavior that cause emotional and spiritual pain. In this book readers will learn powerful ways to: Break the compulsive patterns that run your life, exercise your own free will, and regain control of your thoughts and behavior Free up energy by releasing your pent-up resentments and directly experience your own spirituality Identify what you really want in life, and finally make the changes you have been putting off for years The Hoffman Process is endorsed by an extraordinary array of experts and leaders from all walks of life, and it includes the results of a grant research study proving the long-term effectiveness of the Process. An elementary school Hebrew textbook Expanded coverage of essential math, including integral equations, calculus of variations, tensor analysis, and special integrals Math Refresher for Scientists and Engineers, Third Edition is specifically designed as a self-study guide to help busy professionals and students in science and engineering quickly refresh and improve the math skills needed to perform their jobs and advance their careers. The book focuses on practical applications and exercises that readers are likely to face in their professional environments. All the basic math skills needed to manage contemporary technology problems are addressed and presented in a clear, lucid style that readers familiar with previous editions have come to appreciate and value. The book begins with basic concepts in college algebra and trigonometry, and then moves on to explore more

advanced concepts in calculus, linear algebra (including matrices), differential equations, probability, and statistics. This Third Edition has been greatly expanded to reflect the needs of today's professionals. New material includes: * A chapter on integral equations * A chapter on calculus of variations * A chapter on tensor analysis * A section on time series * A section on partial fractions * Many new exercises and solutions Collectively, the chapters teach most of the basic math skills needed by scientists and engineers. The wide range of topics covered in one title is unique. All chapters provide a review of important principles and methods. Examples, exercises, and applications are used liberally throughout to engage the readers and assist them in applying their new math skills to actual problems. Solutions to exercises are provided in an appendix. Whether to brush up on professional skills or prepare for exams, readers will find this self-study guide enables them to quickly master the math they need. It can additionally be used as a textbook for advanced-level undergraduates in physics and engineering. "This workbook is a life-saver!" This back to school / fall themed workbook was teacher designed as a refresher, and it can be used to ease kids back to school, freshen up their literacy skills and knowledge. Vocabulary, Grammar, Spelling and Punctuation, Writing and Reading are tackled and are fall themed. Different uses: -daily practice -weekend work -homeschooling -class-work Quick overview: The Vocabulary part (8 pages / 6 slides) is aimed at revising different fall words, having fun with labels, crossword and wordsearch, looking for synonyms and antonyms, and playing around with homophones. The Grammar part (7 pages / 7 slides) revises the different parts of speech, dwells on nouns and adjectives, and even verb tenses. In the Spelling and Punctuation part (4 pages / 8 slides) students can find worksheets with arranging words in alphabetical order,

adding missing and end of sentence punctuation, and correcting texts with spelling mistakes. The Writing part (8 pages / 8 slides) was designed to help students write the perfect composition. They are given the story title and a planning & first draft page, then another one to write their final draft. The Reading part (7 pages / 10 slides) starts with naming and explaining the three most important reading strategies and then contains three original fall related stories. Each story contains a before reading set of questions and a reading comprehension set of questions. The Let's Have Fun part (6 pages / 6 slides) focuses on worksheets meant for the students' recreation. It contains a maze, an I spy game, riddles and jokes - all of them fall themed. Why you'll love this workbook? It contains activities for a variety of topics and skills; It's completely no prep; It can be used throughout fall as it covers the main events of the season, such as going back to school, Halloween, or Thanksgiving; With more than 60 pages/slides, you can be sure that this product will cover most of your needs this fall; Huge time saver, answers included. The Digital Version Since the events of 2020, I like to create my activities in print and digital version (in Google Slides / Forms). The digital version can be used as a back-up, or as support. It can be used over and over, as you will own a copy of it. How it works? At the back of the book, you will find a QR code. Scan it with your phone and you will be prompted to make a copy of the document in your own Google Drive. In order to gain access to the Google Slides document, a Google account will be necessary. over 20,000 schools use Lumos Learning Study Programs to improve student achievement on standardized tests and also to master necessary Math, ELA, Writing & Reading Skills. First Published in 2001. Routledge is an imprint of Taylor & Francis, an informa company. A nostalgic compendium of essential knowledge that can help you show the world that you're smarter than a ten-year-old after all! Have you ever stared blankly at your kids when they've asked why the sky is blue? Or clumsily changed the subject when they've wanted to know why the wind blows? If you're done with school, it's likely you're also done knowing the difference between an isosceles and equilateral triangle, and you probably leave participles dangling all over the place. Well, not anymore! Thanks to professional know-it-alls Foley and Coates, you can now gain back your self-respect and actually show those kids a thing or two as you tell it to them straight (and not make it up from fragments of facts you kind of remember). Packed with all the basic facts that have managed to free-fall from our heads over the years, Homework for Grown-ups is the ultimate grammar school refresher course in book form. In fact, there's even a quiz at the end of each chapter to ensure you've been paying attention! Written in the light, engaging style of a favorite teacher and featuring lessons in English, math, history, science, geography, art, and even home economics and recess, this fun and handy guide will help you stop hemming and hawing and start speaking with a lot more authority—and a little less shame. E. FOLEY and B. COATES are editors at Vintage who both live in London. Yes, you can really help your child succeed in math! Even If You Think, You Cannot. Inspire your child to learn and love math with this book that provides parents with simple, hands-on activities for their children-learning math at home. It will be very helpful for parents to know how to help their children succeed in math. Repetition is the path to mastery, and so the logic goes with timed math drills. Maybe you're home schooling, or maybe you're in a district that's gone full speed into Mad Minutes, Math workbook or some other type of timed testing. Either way, your kid needs practice and lots of it. Nobody learns math by osmosis. You learn math by burning up pencils and paper. For that, we offer you this book, which contains a growing collection of more than 100 math worksheets with answer keys that I created while teaching math to my daughters. There are also educational calculators that help illustrate how problems are solved, not just provide answers. All of this has done wonders for my children. And I hope it will do the same for yours. Homework for Grown-ups will entertain while

exercising the mind and equip you to handle your child's lockdown home-schooling without humiliation. Any idea why the sky is blue? Confused about chromosomes? Don't know your isosceles from your equilateral? Forgotten what actually happened in 1066? And are you left slack-jawed when your children ask you what 'quid pro quo' means? With lessons in mathematics and algebra, English language and literature, chemistry and the sciences, geography, history, Latin, modern languages and more, Homework for Grown-ups... is packed with essential information, facts, figures and theories, along with fun but challenging test questions to keep you on your toes and reignite those long-dormant brain-cells.
