In this penetrating analysis of a little-explored area of Japanese cultural history, Timon Screech reassesses the career of the chief minister Matsudaira Sadanobu, who played a key role in defining what we think of as Japanese culture today. Aware of how visual representations could support or undermine regimes, Sadanobu promoted painting to advance his own political aims and improve the shogunate's image. As an antidote to the hedonistic ukiyo-e, or floating world, tradition, which he opposed, Sadanobu supported attempts to construct a new approach to painting modern life. At the same time, he sought to revive historical and literary painting, favouring such artists as the flamboyant, innovative Maruyama Okyo. After the city of Kyoto was destroyed by fire in 1788, its reconstruction provided the stage for the renewal of Japan's iconography of power, the consummation of the 'shogun's painted culture'. "Screech's ideas are fascinating, often brilliant, and well grounded. . . . [Shogun's Painted Culture] presents a thorough analysis of aspects of the early modern Japanese world rarely observed in such detail and never before treated to such an eloquent handling in the English language."—CAA Reviews "[A] stylishly written and provocative cultural history."—Monumenta Nipponica "As in his admirable *Sex and the Floating World: Erotic Images in Japan 1700-1820*, Screech lavishes learning and scholarly precision, but remains colloquial in thought and eminently readable."—Japan Times Timon

Screech is Senior Lecturer in the history of Japanese art at SOAS, University of London, and Senior Research Associate at the Sainsbury Institute for the Study of Japanese Arts and Cultures. He is the author of several books on Japanese history and culture, including *Sex and the Floating World: Erotic Images in Japan 1700 – 1820* (Reaktion, 1999).

Mitsubishi's 4G63t engine is among the most powerful engines ever in the sport-compact world. It's not uncommon to find one of these four-cylinder, iron-block, aluminum-headed, 2-liter turbocharged monsters making more than 1,000 horsepower with the right modifications and tuning - well above the 200-300 hp produced in the factory-made engines. Bolted into such cars as the Mitsubishi Lancer Evolution, Eclipse, and Galant, and the Eagle Talon and Plymouth Laser, the 4G63t has more than a cult following among sport-compact enthusiasts, who know and respect this engine's immense performance potential at the track or on the street. Up until now, in-depth performance information on the 4G63t has been hard to find. For this book, author Robert Bowen went straight to the source, Robert Garcia of Road/Race Engineering in Santa Fe Springs, California. RRE is the most well-known and respected Mitsubishi turbo performance shop in the United States, and Garcia is its in-house engine builder. Mitsubishi enthusiasts will benefit from Garcia's expertise and be able to build better, stronger engines than ever before. "How to Build Max-Performance Mitsubishi 4G63t Engines" covers every system and component of the engine, including the turbocharger system and engine management. More than just a collection of tips and tricks, this book includes a complete history of the engine and its evolution, an identification guide, and advice for choosing engine components and other parts. Profiles of successful built-up engines show the reader examples of what works, and the book includes helpful guidance for choosing your own engine building path.

August 1611. Jack Fletcher is shipwrecked off the coast of Japan - his beloved father and the crew lie slaughtered by ninja pirates. Rescued by the legendary sword master

Masamoto Takeshi, Jack's only hope is to become a samurai warrior. And so his training begins. But life at the samurai school is a constant fight for survival. Even with his friend Akiko by his side, Jack is singled out by bullies and treated as an outcast. With courage in his heart and his sword held high, can Jack prove himself and face his deadliest rival yet?

Honda 1800 Gold Wing 2001-2010 This edition makes available once again Thunberg's extraordinary writings on Japan, complete with illustrations. Carl Peter Thunberg, pupil and successor of Linnaeus-of the great fathers of modern science-spent 18 fascinating months in the notoriously inaccessible Japan of 1775-1776, and this is his story. Carl Peter Thunberg studied at Uppsala University in Sweden where he was a favorite student of the great Linnaeus, father of modern scientific classification. He determined to travel the world and enlisted as a physician with the Dutch East India Company. He arrived in Japan in the summer of 1775 and stayed one year, the maximum continuous term permitted for a European at the time. He traveled to Edo (modern Tokyo) where he became friends with the shogun's private physician, Katsuragawa Hosshu, a notorious rake. They maintained a correspondence even after the Swede had returned to his homeland. Thunberg's 'Travels' appeared in English in 1795 and was never reprinted. This edition makes available once again Thunberg's extraordinary writings on Japan, complete with illustrations. Fully annotated and introduced by Timon Screech.

Dr. Greg Zacharias, former Chief Scientist of the United States Air Force (2015-18), explores next steps in autonomous systems (AS) development, fielding, and training. Rapid advances in AS development and artificial intelligence (AI) research will change how we think about machines, whether they are individual vehicle platforms or networked enterprises. The payoff will be considerable, affording the US military significant protection for aviators, greater effectiveness in employment, and unlimited opportunities for novel and disruptive concepts of operations.

Autonomous Horizons: The Way Forward identifies issues and makes recommendations for the Air Force to take full advantage of this transformational technology. Stefano Gatti describes the theory that underpins this cutting-edge industry, and then provides illustrations and examples from actual practice to illustrate that theory.

The long-awaited second edition of Baker and Hart's "Product Strategy and Management" expertly analyses the nature of product strategy and the management of the entire product life cycle, from new product development to product elimination. The nature and practice of the life cycle are central to the firm's overall strategy for competitiveness. The authors repeatedly emphasize the fact that without product strategy and management there would be no markets, no customers, no competition - and therefore no marketing. Exploring the fundamental relationship between the success of a product and the survival of the firm,

the book employs an innovative four-part structure: Part 1 - The theoretical foundations Part 2 - New product development Part 3 - Product management Part 4 - Product elimination Whether studying at undergraduate, postgraduate or MBA levels, students will find this book essential to their understanding of this increasingly important subject area. Michael Baker is Emeritus Professor of Marketing at the University of Strathclyde where he founded the Department of Marketing in 1971. Past Chairman of the Chartered Institute of Marketing and founder of its Academic Senate, he was Chair of the Marketing Education Group for 16 years and President of its successor, the Academy of Marketing, for 18 years. Susan Hart is Professor of Marketing at Strathclyde University. She has held professorial appointments at Heriot-Watt and Stirling University and visiting positions in the USA, Australia and Europe. She has published numerous articles on the subject of product deletion, new product development and new product launch.

This report reviews engineering's importance to human, economic, social and cultural development and in addressing the UN Millennium Development Goals. Engineering tends to be viewed as a national issue, but engineering knowledge, companies, conferences and journals, all demonstrate that it is as international as science. The report reviews the role of engineering in development, and covers issues including poverty reduction, sustainable development, climate change mitigation and adaptation. It presents the various fields of engineering around the world and is intended to identify issues and challenges facing engineering, promote better

understanding of engineering and its role, and highlight ways of making engineering more attractive to young people, especially women.--Publisher's description. This new title sits in a series of specialist reference volumes, ideal for the use of professionals working directly with competitive athletes. "A World in the Making is a kind of anthropological journey taken by four historians that assumes all societies are "hot," and all people make history and always have. We argue in our emphasis on lives and livelihoods for a world constructed, altered, renovated, remade by ordinary people even as we acknowledge the genius of individual innovators, disruptors who broke the mold or struck out in some new direction."--Provided by publisher. The Mitsubishi Pajero was first launched in 1983, creating a new class of 4x4, smaller and more affordable than the Range Rover. Renamed Shogun for the UK market, and Montero for Spain and the Americas, this rugged, yet refined, off-roader rapidly became Mitsubishi's best-selling export. In the 22 years since its introduction, the Shogun's popularity has gone from strength to strength, and in the UK grey imports of Pajeros now outnumber official Shoguns. This fascinating book, now available in paperback, is essential reading for all Shogun owners and enthusiasts.

Featured on two major television documentaries!

In December 1980, Larry Warren was a member of the Air Force security police stationed at RAF Bentwaters, a NATO base in Great Britain. On the night of the 28th he was on guard duty when he was taken by truck to join other Air Force personnel to investigate a disturbance in a Rendlesham Forest about five miles away, which turned out to be a landed UFO. This was the third night of UFO activity in the area and by far the most profound. When the men were debriefed the next day, they were warned to tell no one about what they had seen-as "bullets are cheap." And so began what would turn out to be the best documented and most significant military-UFO incident in history. This remarkable story, told with the help of investigative writer Peter Robbins, was the basis of two blockbuster television documentaries. "Warren's firsthand account explodes with authentic detail. A riveting, fascinating, and important book." -Whitley Strieber, author of Communion "[H]as the force of a well-told mystery novel, yet it is all disturbingly true. A major contribution to the literature." -Budd Hopkins, author of Missing Time "[O]ne gripping version of the story of this classic UFO case and its aftermath." -Publisher's Weekly "This book is dynamite. Meticulously researched, gripping, provocative..." -Nick Pope, author of Open Skies, Closed Minds "[Q]uestions on these UFO sightings are still being asked in Parliament. If you read this gripping book you will see why." -Focus, journal of the British Ministry of Defence. If you're looking for better understanding of your E36 BMW, look no further! A Bowl for a Coin is the first book in any language to describe and analyze the history of all Japanese teas from the plant's introduction to the archipelago around 750 to the present day. To understand the triumph of the tea plant in Japan, William Wayne Farris begins with its cultivation and goes on to describe the myriad ways in which the herb was processed into a palatable beverage, ultimately resulting in the wide variety of teas we enjoy today. Along the way, he traces in fascinating detail the shift in tea's status from exotic gift item from China, tied to Heian (794 – 1185) court ritual and medicinal uses, to tax and commodity for exchange in the 1350s, to its complete nativization in Edo (1603 – 1868) art and literature and its eventual place on the table of every Japanese household. Farris maintains that the increasing sophistication of Japanese agriculture after 1350 is exemplified by tea farming, which became so advanced that Meiji (1868 – 1912) entrepreneurs were able to export significant amounts of Japanese tea to Euro-American markets. This in turn provided the much-needed foreign capital necessary to help secure Japan a place among the world's industrialized nations. Tea also had a hand in initiating Japan's "industrious revolution": From 1400, tea was being drunk in larger quantities by commoners as well as elites, and the stimulating, habit-forming beverage made it possible for laborers to apply handicraft skills in a meticulous, efficient, and prolonged manner. In addition to aiding in the protoindustrialization of Japan by 1800, tea had by that time become a central commodity in the formation of a burgeoning consumer society. The demand-pull of tea consumption necessitated even greater production into the postwar period—and this despite challenges posed to the industry by consumers' growing taste for coffee. A Bowl for a Coin makes a convincing case for how tea—an age-old drink that continues to adapt itself to changing tastes in Japan and the world—can serve as a broad lens through which to view the

development of Japanese society over many centuries.
