Sarah and Brianna have always been friends, and it's always gone like this: guys talk to Sarah in order to get closer to Brianna. So even though Sarah met Ryan first, she's not surprised that he ends up with Brianna (even though Sarah has a massive crush on him). The three of them hang out, and Sarah and Ryan's friendship grows until one night an innocent exchange between them leads to a moment that makes Sarah realize that Ryan might be interested in her after all. But if there's one unwritten rule, it's this: you don't mess around with a friend's boyfriend. So Sarah tries to resist temptation. But with the three of them thrown together more and more, tension builds between Sarah and Ryan, and when they find themselves alone together at one point, they realize they just can't fight how they feel anymore.... "This is Alice. She was taken by Ray five years ago. She thought she knew how her story would end. She was wrong." -- [P.4] Cover. The Pillars of the Earth sweeps through 12th-century England in an era of raging civil war, telling of a group of men and women whose fates are linked to the building of a great cathedral, a site of bloodshed and treachery. A masterpiece of raw courage and passion from the author of Eye of the Needle. William Morrow. Named one of Culture's Top 10 Best Books of 2020! Leftist firebrand Fredrik deBoer exposes the lie at the heart of our educational system and demands top-to-bottom reform. Everyone agrees that education is the key to creating a more just and equal world, and that our schools are broken and failing. Proposed reforms variously target incompetent teachers, corrupt union practices, or outdated curricula, but no one acknowledges a scientifically-proven fact that we all understand intuitively: Academic potential varies between individuals, and cannot be dramatically improved. In The Cult of Smart, educator and outspoken leftist Fredrik deBoer exposes this omission as the central flaw of our entire society, which has created and perpetuated an unjust class structure based on intellectual ability. Since cognitive talent varies from person to person, our education system can never create equal opportunity for all. Instead, it teaches our children that hierarchy and competition are natural, and that human value should be based on intelligence. These ideas are counter to everything that the left believes, but until they acknowledge the existence of individual cognitive differences, progressives remain complicit in keeping the status quo in place. This passionate, voice-driven manifesto demands that we embrace a new goal for education: equality of outcomes. We must create a world that has a place for everyone, not just the academically talented. But we'll never achieve this dream until the Cult of Smart is destroyed. Megan Hathaway, unable to remember the plane crash of which she was the sole survivor, feels like an empty shell and loses all interest in her life and her friends, but unlikely friends help her face life as a "miracle." Nicholas Rathe is a pointsman, a watchman in the great city of Astreiant, the capital of the Kingdom of Chenedolle. During the annual trade fair when the city is filled with travelers, someone is stealing children. The populace is getting angry and frightened and is looking for someone to blame. Nicholas must find the children and save the city. Seventeen-year-old Ava awakens with amnesia and a feeling that something is wrong with her life, her mother, and her friends but when the mysterious Morgan appears, her flashbacks of life as a spy for a shady government agency begin to make sense. Elizabeth Bowen's account of a time spent in Rome is no ordinary guidebook but an evocation of a city - its history, its architecture and, above all, its atmosphere. She describes the famous classical sites, conjuring from the ruins visions of former inhabitants and their often bloody activities and speculates about the immense noise of ancient Rome, the problems caused by the Romans' dining posture, and the Roman temperament. She evokes the city's moods - by day, when it is characterised by golden sunlight, and at night, when the blaze of the moon 'annihilates history'. Riding a tsunami of information, the public has trampled on the temples of authority in every domain of human activity, everywhere. The Revolt of the Public tells the story of how ordinary people, gifted amateurs networked in communities of interest, have swarmed over the hierarchies of accredited professionals, questioned their methods, and shouted their failures from the digital rooftops. In science, business, media - and, pre-eminently, in politics and government - established elites have lost the power to command attention and set the agenda. The consequences have been revolutionary. Insurgencies enabled by digital devices and a vast information sphere have mobilized millions, toppling dictators in Egypt and Tunisia, crushing the ruling Socialist Party in Spain, inspiring "Tea Parties" and "Occupations" in the United States. Trust in political authority stands at an all-time low around the world. The Revolt of the Public analyzes the composition of the public, the nature of authority and legitimacy, and the part played by the perturbing agent: information. A major theme of the book is whether democratic institutions can survive the assaults of a public that at times appears to be at war with any form of organization, if not with history itself. In a musical career spanning five decades, from Small Talk at a 125th and Lenox (1970) to I'm New Year (2010), Gil Scott-Heron (1949–2011) released twenty albums and many seminal singles including "The Revolution Will Not be Televised,"

"Home is Where the Hatred Is," "Winter in America," "B Movie" "Johannesburg" and "Lady Day and John Coltrane." He was also the author of three previous books—two novels, *The Vulture* (1970) and *The Nigger Factory* (1972) and *Now and Then*, The Poems of Gil Scott-Heron. National Book Award Finalist: "This man's ideas may be the most influential, not to say controversial, of the second half of the twentieth century."—Columbus Dispatch At the heart of this classic, seminal book is Julian Jaynes's still-controversial thesis that human consciousness did not begin far back in animal evolution but instead is a learned process that came about only three thousand years ago and is still developing. The implications of this revolutionary scientific paradigm extend into virtually every aspect of our psychology, our history and culture, our religion—and indeed our future. "Don't be put off by the academic title of Julian Jaynes's *The Origin of Consciousness in the Breakdown of the Bicameral Mind*. Its prose is always lucid and often lyrical...he unfolds his case with the utmost intellectual rigor."—The New York Times "When Julian Jaynes . . . speculates that until late in the twentieth millennium BC men had no consciousness but were automatically obeying the voices of the gods, we are astounded but compelled to follow this remarkable thesis."—John Updike, *The New Yorker* "He is as startling as Freud was in *The Interpretation of Dreams*, and Jaynes is equally as adept at forcing a new view of known human behavior."—*American Journal of Psychiatry* Kate Brown's life has gone downhill fast. Her father has quit his job to sell vitamins at the mall, and Kate is forced to work with him. Her best friend has become popular, and now she acts like Kate's invisible. And then there's Will. Gorgeous, unattainable Will, whom Kate acts like she can't stand even though she can't stop thinking about him. When Will starts acting interested, Kate hates herself for wanting him when she's sure she's just his latest conquest. Kate figures that the only way things will ever stop hurting so much is if she keeps to herself and stops caring about anyone or anything. What she doesn't realize is that while life may not always be perfect, good things can happen -- but only if she lets them.... There's a difference between falling and letting go. Lauren has a good life: decent grades, great friends, and a boyfriend every girl lusts after. So why is she so unhappy? It takes the arrival of Evan Kirkland for Lauren to figure out the answer: She's been holding back. She's been denying herself a bunch of things (like sex) because staying with her loyal and gorgeous boyfriend, Dave, is the "right" thing to do. After all, who would give up the perfect boyfriend? But as Dave starts talking more and more about their life together, planning a future Lauren simply can't see herself in -- and as Lauren's craving for Evan, and moreover, who she is with Evan becomes all the more fierce -- Lauren realizes she needs to make a choice...before one is made for her. Victoria Sparrow's childhood traumas are deep-seated. Her father still rejects her as not being worthy, and her romantic relationships flounder as a result-until Logan Doherty. He gives her reason to believe in goodness and true love, and she commits her heart and soul to him. No longer prey to her damaged, young self, Victoria eagerly looks forward to their upcoming marriage-until she meets Logan at the altar. He informs her the wedding is off before their assembled friends and family, and will not tell her why. Cast back into the nightmare of rejection, a devastated Victoria undertakes the momentous task of putting her life back together, her trust broken, her worst fears realized. Meanwhile, Logan is working equally hard to deal with the secretive events that led to that cruel rejection, and then he plans to make it up to his tattered bride...if she will forgive him. A BARACK OBAMA AND A BILL GATES SUMMER READING PICK 2022 A NEW YORK TIMES AND WALL STREET JOURNAL BESTSELLER 'This book helped me understand modern politics better' - Bill Gates, Summer Reading Pick 2022 'Superbly researched and written' - Francis Fukuyama, The Washington Post 'It's been a long time since I learned so much from one book.' - Rutger Bregman author of *Utopia for Realists* 'Powerful [and] intelligent.' - Fareed Zakaria, CNN America's political system isn't broken. The truth is scarier: it's working exactly as designed. In *Why We're Polarized*, Ezra Klein reveals the structural and psychological forces behind America's deep political divisions, revealing how a system filled with rational, functional parts can combine into a dysfunctional whole. Neither a polemic nor a lament, this book offers a clear framework for understanding everything from Trump's rise to the Democratic Party's leftward shift to the politicisation of everyday culture. Klein shows how and why American politics polarised in the twentieth century, what that polarisation did to Americans' views of the world and one another, and how feedback loops between polarised political identities and polarised political institutions drive the system toward crisis. This revelatory book will change how you look at politics, and perhaps at yourself. *Terrible Old Games You've Probably Never Heard Of* is a full-colour illustrated compendium of the most painfully bad games, based on Ashens' YouTube series of the same name. Everyone's heard of E.T. for the Atari 2600 and Superman for the Nintendo 64, but these are almost nothing next to the abject incompetence of Count Duckula 2 on the Amstrad CPC. There are people who seriously believe that Shaq Fu is the worst fighting game ever made, having never experienced *Dangerous Streets* on the Amiga. This book will blow their very soul apart. (Not a guarantee.) *Terrible Old Games You've Probably Never Heard Of* is meticulously researched and written, with the dry humour you'd expect from a man who has somehow made a living by sticking rubbish on a sofa and talking about it. Each entry is accompanied by a series of full-colour images from the games. What existential threats does humanity face? And how can we secure our future? *The Precipice* is a powerful book . . . Ord's love for humanity and hope for its future is infectious' *Spectator* 'Ord's analysis of the science is exemplary . . . Thrillingly written' *Sunday Times* We live during the most important era of human history. In the twentieth century, we developed the

means to destroy ourselves – without developing the moral framework to ensure we won't. This is the Precipice, and how we respond to it will be the most crucial decision of our time. Oxford moral philosopher Toby Ord explores the risks to humanity's future, from the familiar man-made threats of climate change and nuclear war, to the potentially greater, more unfamiliar threats from engineered pandemics and advanced artificial intelligence. With clear and rigorous thinking, Ord calculates the various risk levels, and shows how our own time fits within the larger story of human history. We can say with certainty that the novel coronavirus does not pose such a risk. But could the next pandemic? And what can we do, in our present moment, to face the risks head on? A major work that brings together the disciplines of physics, biology, earth and computer science, history, anthropology, statistics, international relations, political science and moral philosophy, *The Precipice* is a call for a new understanding of our age: a major reorientation in the way we see the world, our history, and the role we play in it. From the bestselling author of "Bloom" and "Perfect You" comes a romantic but dark coming-of-age story--a moving portrait of love, loss, and identity. Mental disorders arise from neural and psychological mechanisms that have been built and shaped by natural selection across our evolutionary history. Looking at psychopathology through the lens of evolution is the only way to understand the deeper nature of mental disorders and turn a mass of behavioral, genetic, and neurobiological findings into a coherent, theoretically grounded discipline. The rise of evolutionary psychopathology is part of an exciting scientific movement in psychology and medicine -- a movement that is fundamentally transforming the way we think about health and disease. Evolutionary Psychopathology takes steps toward a unified approach to psychopathology, using the concepts of life history theory -- a biological account of how individual differences in development, physiology and behavior arise from tradeoffs in survival and reproduction -- to build an integrative framework for mental disorders. This book reviews existing evolutionary models of specific conditions and connects them in a broader perspective, with the goal of explaining the large-scale patterns of risk and comorbidity that characterize psychopathology. Using the life history framework allows for a seamless integration of mental disorders with normative individual differences in personality and cognition, and offers new conceptual tools for the analysis of developmental, genetic, and neurobiological data. The concepts presented in *Evolutionary Psychopathology* are used to derive a new taxonomy of mental disorders, the Fast-Slow-Defense (FSD) model. The FSD model is the first classification system explicitly based on evolutionary concepts, a biologically grounded alternative to transdiagnostic models. The book reviews a wide range of common mental disorders, discusses their classification in the FSD model, and identifies functional subtypes within existing diagnostic categories. I wonder what it would be like to do high school things. To go out on the weekends. To kiss a guy. To have a normal life. A real one. Everyone thinks their parents are embarrassing, but Hannah knows she's got them all beat. Her dad made a fortune showcasing photos of pretty girls and his party lifestyle all over the Internet, and her mom was once one of her dad's girlfriends and is now the star of her own website. After getting the wrong kind of attention for way too long, Hannah has mastered the art of staying under the radar...and that's just how she likes it. Of course, that doesn't help her get noticed by her crush. Hannah's sure that gorgeous, sensitive Josh is her soul mate. But trying to get him to notice her; wondering why she suddenly can't stop thinking about another guy, Finn; and dealing with her parents make Hannah feel like she's going crazy. Yet she's determined to make things work out the way she wants -- only what she wants may not be what she needs.... Once again, Elizabeth Scott has created a world so painfully funny and a cast of characters so heartbreakingly real that you'll love being a part of it from unexpected start to triumphant finish. Scott Spectrum is being haunted by a ghost giraffe named Jim. Scott thinks he's a man how has everything -- a high-speed internet connection, alien-shaped slippers, and a beautiful wife called Continnence. But Scott hasn't touched her in years and she's been left furiously polishing the sideboard, dreaming of black stallions. According to Jim, Scott's days are numbered, and to save himself from certain death from sexual repression he must quickly perform every act in the lovermaker's lexicon. Jim Giraffe knows a lot about sex, luckily. He also loves pizza and beer and has breath that smells of tree-tops. The prudish Scott is at first shocked by this profane, perverted ghost giraffe, but he accepts his help. Little does Scott realize that Jim has his own agenda and that his suburban idyll is about to be well and truly bugged up. Following on from the cult classic *Boxy an Star*, Daren King has written another extraordinary novel: highly original and linguistically ingenious, naive and knowing, utterly charming, filthy, and very, very funny. Kissinger Center for Global Affairs, Johns Hopkins University Press is pleased to donate funds to the Maryland Food Bank, in support of the university's food distribution efforts in East Baltimore during this period of food insecurity due to COVID-19 pandemic hardships. Scott Drakeford's epic fantasy debut, *Rise of the Mages* combines gripping, personal vengeance with compelling characters for an action packed first book in a trilogy. Emrael Ire wants nothing more than to test to be a weapons master. His final exam will be a bloody insurrection, staged by corrupt nobles and priests, that enslaves his brother. With the aid of his War Master tutor, herself an undercover mage, Emrael discovers his own latent and powerful talents. To rescue his brother, Emrael must embrace not only his abilities as a warrior but also his place as last of the ancient Mage Kings—for the Fallen God has returned. And he is hungry. The inspiring, influential senator and bestselling author mixes vivid personal stories with a passionate plea for political

transformation. Elizabeth Warren is a beacon for everyone who believes that real change can improve the lives of all Americans. Committed, fearless, and famously persistent, she brings her best game to every battle she wages. In *Persist*, Warren writes about six perspectives that have influenced her life and advocacy. She's a mother who learned from wrenching personal experience why child care is so essential. She's a teacher who has known since grade school the value of a good and affordable education. She's a planner who understands that every complex problem requires a comprehensive response. She's a fighter who discovered the hard way that nobody gives up power willingly. She's a learner who thinks, listens, and works to fight racism in America. And she's a woman who has proven over and over that women are just as capable as men. Candid and compelling, *Persist* is both a deeply personal book and a powerful call to action. Elizabeth Warren—one of our nation's most visionary leaders—will inspire everyone to believe that if we're willing to fight for it, profound change is well within our reach. A young school teacher is posted to a remote Aboriginal community, and through his experiences, his encounter with the local people, his discovery of the history of the community, his own history and his Aboriginality are revealed. Like many others in the novel, Billy is struggling to find a meaningful cultural identity and to create a better future from the wreckage of the recent history of Aboriginal people. What he finds at Karnama is a disintegrating community, characterised by government handouts, alcoholism, wife-beating, petrol-sniffing and an indifference to traditional beliefs and practices. It is a depressingly familiar litany of social problems which confirms the smug racial stereotypes of the white community to which Billy initially belongs. True Country offers no clear-cut solution to the realities of powerlessness. What it leaves us with is Billy's vision of the 'true country' which he shares with the unnamed Aboriginal narrator in the final pages of the novel. 'ESSENTIAL' —The New York Times Have you ever wished you could just stop eating the cake, even as you put another forkful in your mouth? Have you ever wondered why exactly you are still eating chips when you are definitely full? This book has the answers. The Hungry Brain isn't about denying yourself the food you love, or never eating pudding again, but the bottom line is that we often eat too much and don't really know why; Guyenet will help the reader to understand exactly why – and more importantly, what to do about it. 'Many people have influenced my thinking on human nutrition and metabolism, but Stephan is the one person who has completely altered my understanding of why we get fat.' Robb Wolf, author of the New York Times bestseller *The Paleo Solution* 'For those interested in the complex science of overeating, it is essential' The New York Times From the author of the beloved novel *The Giant's House* - finalist for the National Book Award - comes a beautiful new story collection, her first in twenty years. Laced through with humour, empathy, and rare and magical descriptive powers these nine vibrant stories navigate the fragile space between love and loneliness. In 'Property', a young scholar, grieving the sudden death of his wife, decides to refurbish the Maine rental house they were to share together by removing his landlord's possessions. In 'Peter Elroy: A Documentary by Ian Casey', the household of a successful filmmaker is visited years later by his famous first subject, whose trust he betrayed. And in the unforgettable title story, a family makes a quixotic decision to flee to Paris for a summer, only to find their lives altered in an unimaginable way by their teenage daughter's risky behaviour. In Elizabeth McCracken's universe, heartache is always interwoven with strange, charmed moments of joy - an unexpected conversation with small children, the gift of a parrot with a bad French accent - that remind us of the wonder and mystery of being alive. *Thunderstruck & Other Stories* shows this inimitable writer working at the full height of her powers. Struggling with grief over a mother who is on life support as well as her slipping grades and her anger with her stepfather, Emma forges an uncharacteristic connection with a local bad boy, Caleb, who makes her heart feel alive again. By the author of *Miracle*. In this wildly original debut – part social-political satire, part international mystery – a new virus turns people into something inhuman, upending society as we know it. It starts when the body of a young woman disappears from the local morgue. Then more corpses, dead from an inexplicable disease that solidified their blood, also vanish. Soon the U.S. government – and eventually biomedical researchers, disgruntled lawmakers, and even an insurgent faction of the Catholic Church – must come to terms with what they're too late to stop: an epidemic of vampirism that will sweep the world. With heightened strength and beauty and a steady diet of fresh blood, these changed people, or "Gloomings", rapidly rise to prominence in all aspects of modern society. Soon people are begging to be "re-created", willingly accepting the risk of death if their bodies can't handle the transformation. As new communities of Gloomings arise, society is divided, and popular Gloomings sites come under threat from a secret terrorist organisation. But when a charismatic and wealthy businessman, recently turned, runs for political office – well, all hell breaks loose... The harrowing true story of abduction and survival from the courageous young woman who lived it—now the subject of a Lifetime original movie, *I Am Elizabeth Smart*. In this memoir, Elizabeth Smart reveals how she survived and the secret to forging a new life in the wake of a brutal crime. On June 5, 2002, fourteen-year-old Elizabeth Smart, the daughter of a close-knit Mormon family, was taken from her home in the middle of the night by religious fanatic Brian David Mitchell and his wife, Wanda Barzee. Elizabeth was kept chained, dressed in disguise, repeatedly raped, and told she and her family would be killed if she tried to escape. After her rescue on March 12, 2003, she rejoined her family and worked to pick up the pieces of her life. With *My Story*, Elizabeth tells of the constant fear she endured every hour, her courageous determination to maintain hope, and how she devised a plan to manipulate her

entombed by paper and books and increasingly estranged from his wife Emma, finds her dying in her bedroom. Between his speaking to her and taking her in his arms, she has gone. The day before, he and Emma had exchanged bitter words - leading Hardy to wonder whether all husbands and wives end up as enemies to each other. His family and Florence Dugdale, the much younger woman with whom he has been in a relationship, assume that he will be happy and relieved to be set free. But he is left shattered by the loss. Hardy's bewilderment only increases when, sorting through Emma's effects, he comes across a set of diaries that she had secretly kept about their life together, ominously titled 'What I Think of My Husband'. He discovers what Emma had truly felt - that he had been cold, remote and incapable of ordinary human affection, and had kept her childless, a virtual prisoner for forty years. Why did they ever marry? He is consumed by something worse than grief: a chaos in which all his certainties have been obliterated. He has to re-evaluate himself, and reimagine his unhappy wife as she was when they first met. Hardy's pained reflections on the choices he has made, and must now make, form a unique combination of love story and ghost story, by turns tender, surprising, comic and true. The Chosen - the extraordinary new novel by Elizabeth Lowry - hauntingly searches the unknowable spaces between man and wife; memory and regret; life and art. An illuminating new biography of one of the greatest American poets of the twentieth century, Elizabeth Bishop "Love Unknown points movingly to the many relationships that moored Bishop, keeping her together even as life—and her own self-destructive tendencies—threatened to split her apart." —The Wall Street Journal Elizabeth Bishop's friend James Merrill once observed that "Elizabeth had more talent for life—and for poetry—than anyone else I've known." This new biography reveals just how she learned to marry her talent for life with her talent for writing in order to create a brilliant array of poems, prose, and letters—a remarkable body of work that would make her one of America's most beloved and celebrated poets. In Love Unknown, Thomas Travisano, founding president of the Elizabeth Bishop Society, tells the story of the famous poet and traveler's life. Bishop moved through extraordinary mid-twentieth century worlds with relationships among an extensive international array of literati, visual artists, musicians, scholars, and politicians—along with a cosmopolitan gay underground that was then nearly invisible to the dominant culture. Drawing on fresh interviews and newly discovered manuscript materials, Travisano illuminates that the "art of losing" that Bishop celebrated with such poignant irony in her poem, "One Art," perhaps her most famous, was linked in equal part to an "art of finding," that Bishop's art and life was devoted to the sort of encounters and epiphanies that so often appear in her work.
