Last year, one amazing summer was enough to turn Iris's world upside down. She met the boy of her dreams, the super talented Zeke, and the two of them set off on a pro-surfing adventure around the globe. Now, one week in Miami could be enough to tear her life apart. When Iris and Zeke take a break from competitions to relax on South Beach, Iris feels more than just the draw of the surf pulling Zeke away from her. Something's not right, and soon Iris will have to decide if she and Zeke are really the best thing for each other after all. Air is the thrilling follow-up to Blue; a gorgeous story of sun, sea and first love. This thesis covers a diverse set of topics related to space-based gravitational wave detectors such as the Laser Interferometer Space Antenna (LISA). The core of the thesis is devoted to the preprocessing of the interferometric link data for a LISA constellation, specifically developing optimal Kalman filters to reduce arm length noise due to clock noise. The approach is to apply Kalman filters of increasing complexity to make optimal

estimates of relevant quantities such as constellation arm length, relative clock drift, and Doppler frequencies based on the available measurement data. Depending on the complexity of the filter and the simulated data, these Kalman filter estimates can provide up to a few orders of magnitude improvement over simpler estimators. While the basic concept of the LISA measurement (Time Delay Interferometry) was worked out some time ago, this work brings a level of rigor to the processing of the constellation-level data products. The thesis concludes with some topics related to the eLISA such as a new class of phenomenological waveforms for extreme mass-ratio inspiral sources (EMRIs, one of the main source for eLISA), an octahedral space-based GW detector that does not require drag-free test masses, and some efficient template-search algorithms for the case of relatively high SNR signals. This book tells the story of Leonardo Da Vinci's Mona Lisa, based on a pedagogical approach, in order to present information accessibly, even for those who do not have a background in History or History of Art. On the other hand, the book brings well-documented information, based on testimonials of some of the most renowned researchers who have studied the subject. Before addressing the subject of the book, the author presents the stories of the first three portraits painted by Leonardo Da Vinci: the portrait of Ginevra de' Benci; the portrait known as The lady with an Ermine and the portrait of La Belle Ferronnière, aiming to use these three paintings to observe Leonardo's evolving creative process in portrait painting (non-religious paintings), before painting his iconic Mona Lisa, which is thoroughly analyzed in many aspects. #1 NEW YORK TIMES BESTSELLER * #1 SUNDAY TIMES BESTSELLER * #1 INDIE NEXT PICK A Best Book of the Year: The Washington Post * NPR * The Atlantic * New York Public Library * Vanity Fair * PBS * Time * Economist * Entertainment Weekly * Financial Times * Shelf Awareness * Guardian * Sunday Times * BBC * Esquire * Good Housekeeping * Elle * Real Simple "THIS IS THE BEST BOOK OF THE YEAR. This is one of the strategic directions of further research on programming languages. Object oriented languages aim at high reusability and extensibility by introducing polymorphism and inheritance concepts. The goal of the project is to incorporate ideas of various programming paradigms into attribute grammars to achieve better reusability, modularity and extensibility. Qatar University chose to support the growing academic interest and research in the field by hosting the Association Internationale de Dialectologie Arabe (AIDA) conference in 2013. The AIDA10 conference and the tenth volume of AIDA proceedings show that a good deal of change and development in the field is occurring. Fewer papers deal on hitherto unknown dialects as the white spots on the map of Arabic dialects have significantly shrunk. More papers focus on syntactical issues because we now possess more and larger text collections. Papers using "change" in their titles indicate that Arabic dialectology has a long history. The time has come to re-examine the studies of the 1940s, 50s, and 60s concerning the dialects of certain regions. This book includes twenty one essays with six written in French. Claudia and Seth go on their first date in a very long time to the Royal Opera House. But when the night ends in disaster, Claudia suddenly finds herself facing life - and Christmas - alone. Life alone is exciting, scary and full of soon-forgotten exercise regimes and ill-advised attempts at crafting sexy underwear. It's also filling up with dates, surprisingly. With best friends Penny and Nick at her side, a surplus of festive markets, mulled wine and Christmas tunes, Claudia attempts to face all this change with gusto. One thing's for certain: this year, Christmas is going to be very different . . . This is the story of Claudia and her twelve dates of Christmas. Hilarious, uplifting and romantic, it's a story about losing love, about finding love, and about discovering what's been there all along. Expect a whole heap of Christmas sparkle, butterflies-in-your-stomach romance and a lot of very funny moments in The Twelve Dates of Christmas.
