**The Essence of Photography, 2nd Edition** Apr 28 2021

**In this fully revised and greatly expanded second edition of *The Essence of Photography*, world-renowned photographer and teacher Bruce Barnbaum draws upon 50 years of experience and observation to teach the art of photographic seeing and creativity.**

There is a lot more to photography than simply picking up a camera, pointing it toward something, and tripping the shutter. Achieving a great photograph requires thought and preparation, an understanding of the photographic process, and a firm grasp of how light and composition affect a photo. There must be personal involvement and personal expression. There must be experimentation, with the recognition that only a small percentage of experiments end successfully.

In this revised and expanded second edition of *The Essence of Photography*, best-selling author and world-renowned photographer and teacher Bruce Barnbaum explores these seldom-discussed issues by drawing upon his personal experiences and observations from 50 years of photographing and teaching. In addition to photographs, Bruce also uses painting, music, and writing, as well as the sciences and even business, to provide pertinent examples of creative thinking. These examples serve as stepping stones that will lead you to your own heightened ability to see and be creative.

Creativity is a topic that is almost wholly ignored in formal education because most instructors think that it cannot be taught or learned. To the contrary, Bruce has proven that photographic seeing and creativity can be taught, learned, and improved. This book expands on the ideas that are central to Bruce's method of teaching photography, which he has used in workshops for the past 50 years.

Included in the book are in-depth discussions on the following topics:

- Defining your own unique rhythm and approach as a photographer
- How to translate the scene in front of you to the final photograph
- The differences and similarities between how an amateur and a professional approach photography
- The differences between realism and abstraction, and the possibilities and limitations of each
- Learning to expand your own seeing and creativity through classes, workshops, and associating with other photographers
- Why the rules of composition should be ignored
- How to follow your passion
- When to listen to the critics and when to ignore them

The book is richly illustrated with well over 100 photographs taken by Bruce as well as other photographers.

Seeing and creativity are difficult to teach, but not impossible. This very different, perhaps groundbreaking book is sure to inspire photographers of all skill levels—from beginners to seasoned professionals—to think deeply about the issues involved in creating successful photographs.

In this newest edition of the book, Barnbaum has included many new images and has completely revised the text, with particular focus on two crucial chapters covering digital photography: he revised a chapter covering the digital zone system, and includes a brand-new chapter on image adjustments using digital tools. There is also a new chapter discussing the concepts of “art versus technique” and “traditional versus digital” approaches to photography. Throughout the book, Barnbaum goes well beyond the technical, as he delves deeply into the philosophical, expressive, and creative aspects of photography so often avoided in other books. Barnbaum is recognized as one of the world's finest landscape and architectural photographers, and for decades has been considered one of the best instructors in the field of photography. **Female Subjects in Black and White** Jul 20 2020 "This brilliant and timely collection takes us far in documenting the complex intrapsychic worlds and intersubjective relations of race, gender, and culture. Questions concerning how race and ethnicity create and refract unconscious fantasy and self-construction must be at the forefront of contemporary psychoanalytic thinking."—Nancy J. Chodorow, author of *The Reproduction of Mothering* "Bold. Daring. Provocative. This collection of essays emphatically demonstrates that rhetorical meaning, constituted in the text and the world, evolves from mediations of the psychical and the material, the personal and the social. The critical models displayed so forcefully here will not only influence psychoanalytic and feminist discourses but literary and cultural studies as well."—Claudia Tate, George Washington University

**New Ways of Seeing** Nov 16 2022 Those born since the digital revolution, seem to have the hardest time re-imagining the role of photography in the world today. Thinking of photography as a visual language is the approach this book adopts to address this challenge. Considering photography in this way develops the metaphor of 'learning a language' when attempting to explain what photography can be, and what it can give a student in transferable creative and life skills. This begins with challenging the pre-conception that successful photography is defined by the successful single image or 'the good photograph'. The book emphasises the central role of narrative and visual storytelling through a technique of 'photosketching' to develop the building blocks of visual creativity and ultimately to craft successful bodies of photographic work. *New Ways of Seeing* explains how to both learn and teach photography as a visual language, appropriate for both professionals and students working today.

**Seeing Silicon Valley** Nov 23 2020 Also published in French as *Visages de la Silicon Valley*.

There are self-portraits as well as female photographers' portraits of female photographers, daughters, mothers and, of course, several important female figures including Virginia Woolf, Greta Garbo, Martha Graham, Simone de Beauvoir, Maria Callas, Madonna, Hillary Clinton, and even Her Majesty the Queen.

*Photography and Place* Mar 08 2022 As a recording device, photography plays a unique role in how we remember places and events that happened there. This includes recording events as they happen, or recording places where something occurred before the photograph was taken, commonly referred to as aftermath photography. This book presents a theoretical and historical analysis of German photography of place after 1945. It analyses how major historical ruptures in twentieth-century Germany and associated places of trauma, memory and history affected the visual field and the circumstances of looking. These ruptures are used to generate a new reading of postwar German photography of place. The analysis includes original research on world-renowned German photographers such as Thomas Struth, Thomas Demand, Michael Schmidt, Boris Becker and Thomas Ruff as well as photographers largely unknown in the Anglophone world.

acting on the body as much as on the mind, and rendering death and loss more acutely than any other medium. This groundbreaking approach established *Camera Lucida* as one of the most important books of theory on the subject, along with Susan Sontag's *On Photography*.

Seeing Being Seen Sep 14 2022 This memoir of Michelle Dunn Marsh's life and work as a book designer, cultural producer, and publisher unfolds through photographs drawn from the author's collection (featuring many prints gifted to her from projects, or obtained through trade), and notes on her formative encounters with some of American photography's master practitioners over the last twenty-five years. Portraits of her by Stephen Shore, Larry Fink, Sylvia Plachy, Will Wilson, and others punctuate a loosely chronological narrative exploring the author's evolution of seeing, the influences of family, education, geographies, mentors, and photography itself on that process, and her commitment to the printed book as a vessel of future histories.

**Believing Is Seeing** Aug 13 2022 Academy Award–winning director Errol Morris turns his eye to the nature of truth in photography In his inimitable style, Errol Morris untangles the mysteries behind an eclectic range of documentary photographs. With his keen sense of irony, skepticism, and humor, Morris shows how photographs can obscure as much as they reveal, and how what we see is often determined by our beliefs. Each essay in this book is part detective story, part philosophical meditation, presenting readers with a conundrum, and investigates the relationship between photographs and the real world they supposedly record. *Believing Is Seeing* is a highly original exploration of photography and perception, from one of America's most provocative observers.

*Street Seen* Dec 05 2021 This in-depth and generously illustrated look at six postwar photographers, along with a selection of their predecessors and contemporaries, captures a unique and pivotal moment in American photographic history. World War II and its aftermath ushered in a new era of artistic expression. Abstract Expressionism, film noir, Beat poetry, and the New Journalism are often considered responses to war's shocking realities. Creative photographers responded to the same situation with images that broke the rules of conventional photographic technique. *Street Seen*, a companion volume to an exhibition, highlights six photographers who were prominent during and immediately following the war. Lisette Model's unflinching look at the urban environment; Louis Faurer's portraits of eccentrics in Times Square; Ted Croner's haunting night images; Saul Leiter's evocative glimpses of daily life; William Klein's graphic, confrontational style; and Robert Frank's documentation of American ideals gone awry these and other beautifully reproduced photographs communicate the emotional resonance of everyday life in postwar America. An essay by Lisa Hostetler explores the aesthetic revolution that took place after the war and reveals the principles of spontaneity and subjective interpretation that guided these photographers as they sought to make sense of new realities. A timeline, brief biographies, and bibliography are also included in this valuable compilation of the mid-century's most influential photography.

**Little Book of Contemplative Photography** Jun 11 2022 Restorative justice pioneer Howard Zehr is also an accomplished photographer. He begins his latest book with a confession—"I have written this book in part to encourage myself to slow down, to heighten my imagination, to renew myself while I gain a new view of the creation and the creator." With this book, Zehr makes a gift to anyone who would like to couple photography with seeing and thinking more deeply. In each chapter he offers a Purpose, a Problem, and an Activity with a camera in order to "practice mindfulness." You'll not need a fancy camera, but if you have one it won't hurt. Zehr's chapter-by-chapter exercises are aimed at heightening visual awareness and imagination—all while doing good and working for justice. A title in The Little Books of Justice and Peacebuilding Series.

The Tao of Pooh Oct 11 2019

*Seeing Through Race* Dec 25 2020 “Seeing Through Race is an indispensable and highly original account of how white Americans understood and remembered the civil rights movement of the 1960s. Berger shows us why photography was so central to civil rights, and his readings of iconic images are always penetrating and at times brilliant. His central argument, that whites wanted to be in charge of the movement, is complemented with rich insights on almost every page. It should be required reading for anyone interested in protest movements.” —John Stauffer, Chair of the History of American Civilization and Professor of English and African and African American Studies at Harvard University “The fervor of the 1960s civil rights movement may seem outdated by now, but terrible scenes enacted on the streets of Selma and Birmingham are preserved in the mass of surviving news photographs. Martin Berger argues that these pictures were never simple visual documents. By awakening the nation to the horrific violence of fire hoses and attack dogs, they defined what was meant by “civil rights movement.” Always engaging in its narrative as well as in its analytical and theoretical discourse, *Seeing through Race* is a stunning achievement both as history and as criticism.” —Alan Trachtenberg, Neil Gray, Jr. Professor Emeritus of English and American Studies at Yale University
