Stein at the center of a feminist and multicultural account of twentieth-century innovative writing. Her meticulously argued work maps literary affiliations that connect Stein to the work of Harryette Mullen, Daphne Marlatt, Betsy Warland, Lyn Hejinian, and Theresa Hak Kyung Cha. By distinguishing a vocabulary—which is flexible, evolving, and simultaneously individual and communal—from a lexicon—which is recorded, fixed, and carries the burden of masculine authority—Mix argues that Stein's experimentalism both enables and demands the complex responses of these authors. Arguing that these authors have received relatively little attention because of the difficulty in categorizing them, Mix brings the writing of women of color, lesbians, and collaborative writers into the discussion of experimental writing. Thus, rather than exploring conventional lines of influence, she departs from earlier scholarship by using Stein and her work as a lens through which to read the ways these authors have renegotiated tradition, authority, and innovation. Building on the tradition of experimental or avant-garde writing in the United States, Mix questions the politics of the canon and literary influence, offers close readings of previously neglected contemporary writers whose work doesn't fit within conventional categories, and by linking genres not typically associated with experimentalism—lyric, epic, and autobiography—challenges ongoing reevaluations of innovative writing. Toklas—the true power behind the throne. "One of the best introductions to Gertrude Stein's work I've ever read. Joan Retallack's research is thorough and impressive, and she has done an outstanding job of assembling a valuable and interesting collection of Stein's writings."--Hank Lazer, author of Lyric & Spirit "This exquisitely edited volume of Gertrude Stein's writings is far more informative than the usual 'selected works.' Out of the immense opus that Stein produced over a long and prolific career, Joan Retallack has chosen telling pieces, so as to show both the extraordinary thematic, generic, and stylistic variety, and the coherence of her life's work. Meanwhile, Retallack's delightful and informative introduction can stand on its own as a luminous contribution to our understanding of Gertrude Stein's work and her place in literary history. The fascinating documents that end the book can be regarded as the sweet at the end of a fully satisfying and memorable experience. This is an essential book for both new and long-term discoverers of the wonder of Gertrude Stein's writings."--Lyn Hejinian, author of The Language of Inquiry "Retallack's illuminating introduction is a vital contribution to our knowledge of Stein, revelatory of such issues as racism while viewing Stein's presence on the page and in the ear as performative play that creates a sensual apprehension of a new time (a perception of the activity of happiness). The selections and introduction demonstrate how Stein changed reading and perceiving."--Leslie Scalapino, author of It's go in horizontal Musaicum Books presents to you this carefully created collection of Gertrude Stein's renowned novels, stories, poems, plays and essays. Coming Reflections on the Atom Bomb Biographies The Autobiography of Alice B. Toklas Picasso Portraits of Painters Gertrude Stein (1874-1946) was an American novelist, poet, playwright and art collector, best known for Three Lives, The Making of Americans and Tender Buttons. Stein moved to Paris in 1903, and made France her home for the remainder of her life. Picasso and Cubism were an important influence on Stein's writing. While living in Paris at the beginning of the twentieth century, expatriate American writers Edith Wharton (1862-1937) and Gertrude Stein (1874-1946) never crossed paths. Even so, they did rub shoulders in print, in autobiographical essays published by The Atlantic Monthly in 1933. Noel Sloboda shows that the authors pursued many of the same professional goals in these essays and in the book-length life writings that grew out of them, A Backward Glance (1934) and The Autobiography of Alice B. Toklas (1933). By analyzing the personal and cultural contexts in which these works were produced, as well as subjects common to both of them, Sloboda illuminates a previously unrecognized solidarity between Wharton and Stein. The relationship between the authors is built upon careful analysis of A Backward Glance and The Autobiography of Alice B. Toklas, and it is framed by a consideration of the markets into which their life writings were first released. The alignment of Wharton and Stein as life writers will be of interest to those studying autobiography, modern literature, and American women writers. Digte, noveller, skuespil, essays og artikler af blandet karakter A collection of writings by Gertrude Stein written between 1932 and her death in 1946. This book is a cultural history of Stein's rise to fame and the function of literary celebrity in America from 1910 to 1935. By examining not the ways that Stein portrayed the popular in her work, but the ways the popular portrayed her, this study shows that there was an intimate relationship between literary modernism and mainstream culture and that modernist writers and texts were much more well-known than has been previously acknowledged. Specifically, Leick reveals through the case study of Stein that the relationship between mass culture and modernism in America was less antagonistic, more productive and integrated than previous studies have suggested. For Gertrude Stein, "The Making of Americans" was always her masterpiece. A novel of unparalleled scope and encyclopedic ambition, it is a family history that at once becomes an expose of the possibilities of modern art, language, and psychology. George Moore's study is the first to examine, in its entirety, the novel and its role in the development of Stein's aesthetic. Through a comprehensive analysis of her use of repetition, her theories of art and human character, and her changing relationship to writing itself, Moore argues convincingly for the psychological basis of Stein's theory of language, and the centrality of "The Making of Americans" to the development of Stein's modernism." The author describes her friendship with Picasso, traces the artist's life and career, and analyzes his approach to painting Gertrude Stein and Richard Wright began their careers as marginals within marginalized groups, and their desire to live peacefully in unorthodox marriages led them away from America and into permanent exile in France. Still, the obvious differences between them - in class, ethnic and racial origins, and in artistic expression - beg the question: What was there to talk about? This question opens a window onto each writer's meditations on the influence of racial, ethnic, and national origins on the formation of identity in a modern and post-modern world. One of Stein's most revealing novels. A midcareer, assessment of herself, her writing and her, relationships, all composed in her unique, celebrated style., Taking elements from various genres, Stein, meditates on her writing whilst interposing, details from her everyday life - marriage to Alice, B Toklas, visits from Josephine Baker, travels to, France, inquiries into names and the nature of, identity and virtually anything that occurs to, her! The 1937 Sequel to THE AUTOBIOGRAPHY OF ALICE B TOKLAS, is Stein's account of her triumphant return to the U.S, and a meditation of the meaning of identity, success and America. I used to be fond of saying that America was a land of failure. Most of the great men in America had a long life of early failure and a long life of later failure'. A darker work than TOKLAS, but written in a similarly engaging manner, this is Stein at her most accessible and her most serious; it

should be amongst her most popular books.' First published in 1936 and long out of print, *The Geographical History of America* brings together prose pieces, dialogues, philosophical meditations, and playlets by one of the century's most influential experimental writers. This short but brilliant book offers a dimension of Gertrude Stein's thinking not available elsewhere. Here Stein sets forth her view of the human mind: what it is, how it works, and how it is different from - and more interesting than - human nature. *Geographical History* also elaborates on Stein's concepts of identity, landscape, presence, and composition. Today, as literary discourse pays more attention to textuality, to voice, reader-response, and phenomenology, Stein emerges as a pioneering modernist to whom the century is slowly catching up. For those in the performing arts, *Geographical History* further addresses the notion of play as landscape, one of Stein's most influential theatrical ideas, as well as such issues as dialogue, character, and dramatic structure - in a book that is itself a model of modern experimentation. *The Making of Americans*, by Gertrude Stein. In one volume with page and line numbers matching the Dalkey edition. For ready reference with *The Notebooks of Gertrude Stein* by Leon Katz. On first glance, it seems as if Stein's attempt to reconstitute myth and epic as cultural functions provides a sense of cultural logic in which a nation and its citizens can start to recover from fragmentation. On second glance, however, it becomes apparent that American mythology does not lead to enlightenment regarding how the nation forms its citizens and how observable knowledge is rationalized as being embodied in an ideal citizenry. Instead, Stein's modernist project rewrites the modern form of epic and recasts the narrator as an epic hero, where discursive challenge and generic revision is neither a singular nor a deliberate action, but rather a reiterative practice that challenges classical narrative structures, idealized subjectivities, and traditional modes of interpretation. The first in a two-volume set of works combines fiction with the author's personal experiences in Paris and includes the play *Four Saints in Three Acts* and *Lifting Belly*, in which she documents her wonderful relationship with Alice B. Toklas. In "The Making of Americans," Gertrude Stein sets out to tell "a history of a family's progress," radically reworking the traditional family saga novel to encompass her vision of personality and psychological relationships. As the history progresses over three generations, Stein also meditates on her own writing, on the making of "The Making of Americans," and on America. First published in 1936, *The Geographical History of America* compiles prose pieces, dialogues, philosophical meditations, and playlets by one of the century's most influential writers. In this work, Stein sets forth her view of the human mind: what it is, how it works, and how it is different from - and more interesting than - human nature.
